

Connecting Your Android Device to the LSFC BYOD Network

There are many different versions of Android OS over a multide of devices. This guide is taken from a Huawei phone running Android 8.0.0. Whilst the exact screenshots may vary on your phone, the process should be the same.

Open "Settings > Wi-Fi" and select the "LSFC-BYOD" wireless network. There is no password so you will be connected automatically. You should then get a prompt to Sign-in to the WiFi Network. Please tap this prompt to be taken to the login page.

Android System	
Sign in to Wi-Fi network "LSFC-BYOD"	
Wi-Fi	
Wi-Fi+	On >
AVAILABLE NETWORKS	
LSFC-BYOD Connected (requires login/authorisation)	(i)
Lordswood Girls School Saved, encrypted (average quality)	();
Lordswood Guest Saved, encrypted (no Internet access)	(î;
AndroidAP Encrypted	
Add network	

Please enter your network username and password into this box (the same username and password that you use to log in to the school computers). You will see a brief message that your account details are being authenticated.

LAT Lor Authentication Access	uswood opmes ist on Required for Wireless
User Name Password	Log In
Pow	ered by Ruckus Wireless

Once you have been authenticated, you may get an error message. This can be ignored as it is a built-in issue with Google's redirect settings that point to a page that no longer exists.

仚	C check.googlezip.net/e2	2	:
404.	That's an error.		
The requested URL /e2e_probe?q=9815ebee- 2de4-4c56-9fc3-e911cb4079bd was not found on this server. That's all we know.			

The next step is to install our security certificate. This will enable us to provide you with secure, filtered connectivity whilst ensuring any inappropriate or illegal content can't be accessed. To do this, please browse to the following site:

http://smoothwall.lordswoodgirls.co.uk/getmitm

Alternatively, if you have a QR Code Reader app you can scan below to access to the correct page.

From this page, tap on the blue "Download Certificate" button. You will be prompted to Download the certificate - please tap the "Download" button at this prompt.

smoothwall					
HTTPS Interception					
This system is configured to use HTTPS Interception. For this to work your device may require an additional security certificate to avoid problems with HTTPS sites, in particular those with HSTS or HTTPS certificate					
pinning. Please note: You only need to apply the inspection root certificate once.	▲ Do y inter again	ou want ception n?	to downloa ca_certifica	d <u>https_</u> ate.crt	×
Internet Explorer			Cancel	Downlo	ad
Chrome (Windows)		\langle	\bigcirc		
Firefox (Windows)		7	0		
Safari (OS X)					
iPad, iPhone, iPod, iOS (Safari)					
Android (Chrome)					
Chromebook, ChromeOS					

You will be asked to give the certificate a name. This can be anything, but it's best to make it easily identifiable in case settings need to be changed in the future. Something like "Lordswood" will be fine.

Certificate Installer	
Name the certificate	
Certificate name:	
lordswood	
Credential use:	
VPN and apps	•
The package contains: one CA certificate	
CANCEL	к

Once you tap "OK", the process is finished and you will be fully authenticated and able to browse the internet.
